

# The Beyond NLP Practitioner Plus

## Professional & Personal Development Programme

**July – December 2017**

*"NLP is one of the most powerful and effective approaches for personal and professional development. This special 15 day Practitioner Training will offer you not only the essential NLP Practitioner models and skills, but also a programme for your personal and professional development. It will provide a powerful shift in your ability to lead and manage yourself and others and to get the outcomes you want in every aspect of your life."*

**Marie Faire**

This programme is a full and thorough training in essential Practitioner NLP skills. We take a lot of care in the design of this programme. Our intention for you is that you not only learn the technology of NLP but that you "get it in the muscle" to apply in your everyday life.

NLP is both an attitude of mind and a set of tools and techniques for living a more fulfilled life. Our Practitioner will offer you tools to lead the life you want to live. It will provide you with more choice; a step change in your ability to lead from within, to understand and influence others, and will increase your ability to achieve your outcomes.

*"I began to believe in my own ability and remove my self created barriers to success."*

**SB, Chief Executive**

We take an approach where you will live your learning. With a maximum group size of 15, individual and group process becomes the content for applying and developing your NLP skills.

The small group format ensures a high level of personal focus from the trainers and an individually tailored and focused learning experience.

We have 30 years' experience working with NLP. This includes coaching individual executives, working in a variety of contexts with our in-house clients and more than 20 years of training NLP.

We also have a broad knowledge and experience of many different people and organisation development approaches beyond NLP, which provide additional dimensions to our training design and teaching.

Our focus is on application in the 'real world'. We will draw upon many practical examples. Our participants come from diverse backgrounds and roles within the private, public and voluntary sectors.

### The Training

This training is recognised by ANLP and complies with their standards and codes of practice.

### Our Commitment

We are rigorous in our standards and integration assessment, and completely committed to supporting you on your learning journey and in developing outstanding (NLP) capability at a personal, interpersonal and group level.
